Exploratory Test Report — Swag Labs (saucedemo.com)

Tester: Bolin Yu · **Date:** 2026-11-01 · **Build:** public demo at https://www.saucedemo.com · **Browser:** Chromium 1.64 (Playwright), Linux, 1280×800

> Swag Labs is a public demo store built for test practice. Several of its test accounts ship with deliberate defects. Every finding below was reproduced during this session (screenshots are in `evidence/`).

1. Summary

Metric	Value
Test cases executed	21
Passed	12
Failed (defects)	7
Observations / not measured	2
Automated checks	13 Playwright tests, all green

The core purchase flow for `standard_user` works. The defects are concentrated in the `problem_user`, `error_user` and `visual_user` accounts, plus one logic gap for every user: an order can be completed with an empty cart.

2. Test plan

- **Scope:** login, session protection, inventory, sorting, cart, the 3-step checkout, and the visual consistency of prices.
- **Out of scope:** payment processing (mocked by the site), API and load testing, accessibility audit.
- **Approach:** session-based exploratory testing (about 60 minutes) driven by charters, plus scripted regression checks with Playwright.
- **Test data:** the site's published accounts (`standard_user`, `locked_out_user`, `problem_user`, `performance_glitch_user`, `error_user`, `visual_user`; password `secret_sauce`). Customer data: Ann / Lee / 100085.
- **Entry and exit criteria:** the site is reachable; every charter has been executed and every defect reproduced at least twice.

3. Defects

ID	Severity	Account	Summary	Steps to reproduce	Expected	Actual
BUG-01	Major	problem_user	Every product shows the same broken image	Log in and view the inventory	Each product has its own image	All 6 images use `/assets/sl-404-*.jpg` (a dog placeholder). See `evidence/problem_user_images.png`
BUG-02	Major	problem_user	Sorting has no effect	Sort by Price (low to high)	Prices ascending	Order unchanged ($29.99, $9.99, $15.99, ...)
BUG-03	Critical	problem_user	Typing in Last Name overwrites First Name, so checkout cannot be completed	Checkout, type "Ann" in First and "Lee" in Last, then Continue	Both fields keep their values	First = "Lee", Last = "" → "Error: Last Name is required". See `evidence/problem_user_checkout.png`
BUG-04	Major	error_user	Sorting throws an alert	Sort by Name (Z to A)	List reorders	Alert "Sorting is broken! This error has been reported to Backtrace."; list unchanged
BUG-05	Major	problem_user, error_user	Only some items can be added to the cart	Click every "Add to cart"	Badge shows 6	Badge shows 3; the other buttons do nothing

ID	Severity	Account	Summary	Steps to reproduce	Expected	Actual
BUG-06	Major	all (verified with standard_user)	An order can be placed with an empty cart	Open an empty cart → Checkout → fill the form → Continue → Finish	Checkout disabled or a warning	Reaches checkout-complete ("Thank you for your order!"). See `evidence/standard_empty_cart_checkout.png`
BUG-07	Major	visual_user	Inventory prices differ from the real prices	Log in and compare with standard_user	$29.99, $9.99, ...	Random values, e.g. $2.73, $90.98, $83.74. See `evidence/visual_user.png`

4. Observations (not confirmed as defects)

- **OBS-01:** the checkout form accepts whitespace-only names and a non-numeric postal code ("abc"), then proceeds to step 2. This may be intended for a demo, but in production it would be a validation gap.
- **OBS-02:** `performance_glitch_user` is documented as slow to log in. My quick timing measurement was not precise enough to confirm a difference, so this is left unverified.

5. Automation

`tests/` contains 13 Playwright tests: auth (4), shop and checkout (6), and known defects (3). The known-defect tests use `test.fail()`, so they pass while the bug is present and alert when it gets fixed. Run with `npm install && npx playwright install chromium && npm test`.

6. Recommendations

1. Fix BUG-03 and BUG-06 first, because they block or corrupt orders.
2. Add a server-side cart-not-empty guard and form validation rules (trim names, check the postal code format).
3. Add visual regression snapshots to catch issues like BUG-01 and BUG-07.

Full test case list: `test-cases.csv` (21 cases).

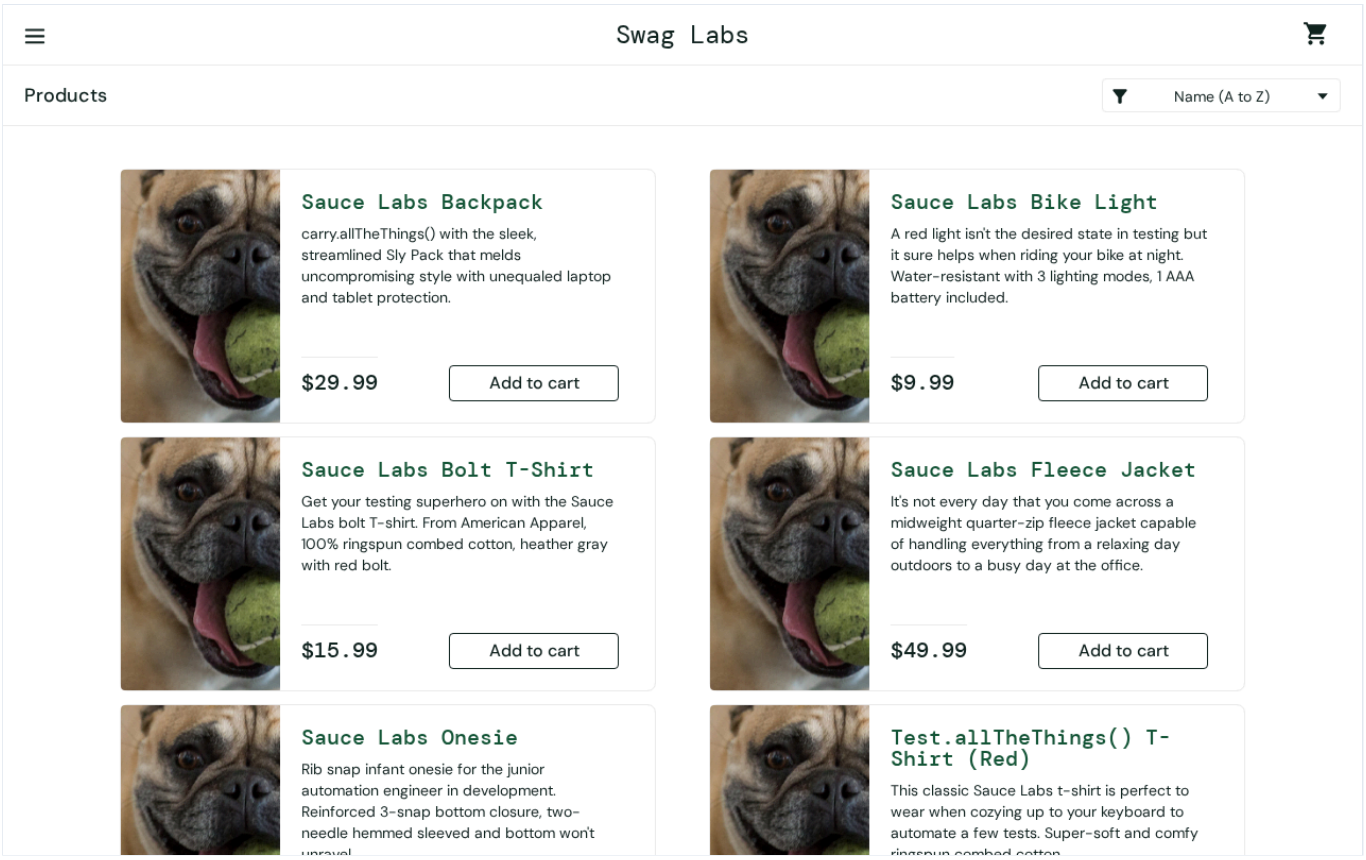

Appendix A — Test cases

ID	Area	Title	Steps	Expected	Result (standard_user unless noted)	Automated
TC-01	Login	Valid login	Enter standard_user / secret_sauce; Login	Inventory page opens	Pass	Yes
TC-02	Login	Locked-out user	Login as locked_out_user	Error "user has been locked out	Pass	Yes
TC-03	Login	Empty credentials	Click Login with empty fields	Error "Username is required"	Pass	Yes
TC-04	Login	Wrong password	standard_user / wrong	Error message shown	Pass	No
TC-05	Security	Deep link without session	Open /inventory.html logged out	Redirect to login with error	Pass	Yes
TC-06	Login	Logout	Menu > Logout	Return to login page	Pass	Yes
TC-07	Inventory	Product list	Open inventory	6 products with name/price/image	Pass	Yes
TC-08	Inventory	Product images (problem_user)	Login as problem_user	Each product shows its own image	FAIL - BUG-01	Yes
TC-09	Sorting	Price low to high	Select Price (low to high)	Ascending prices	Pass	Yes

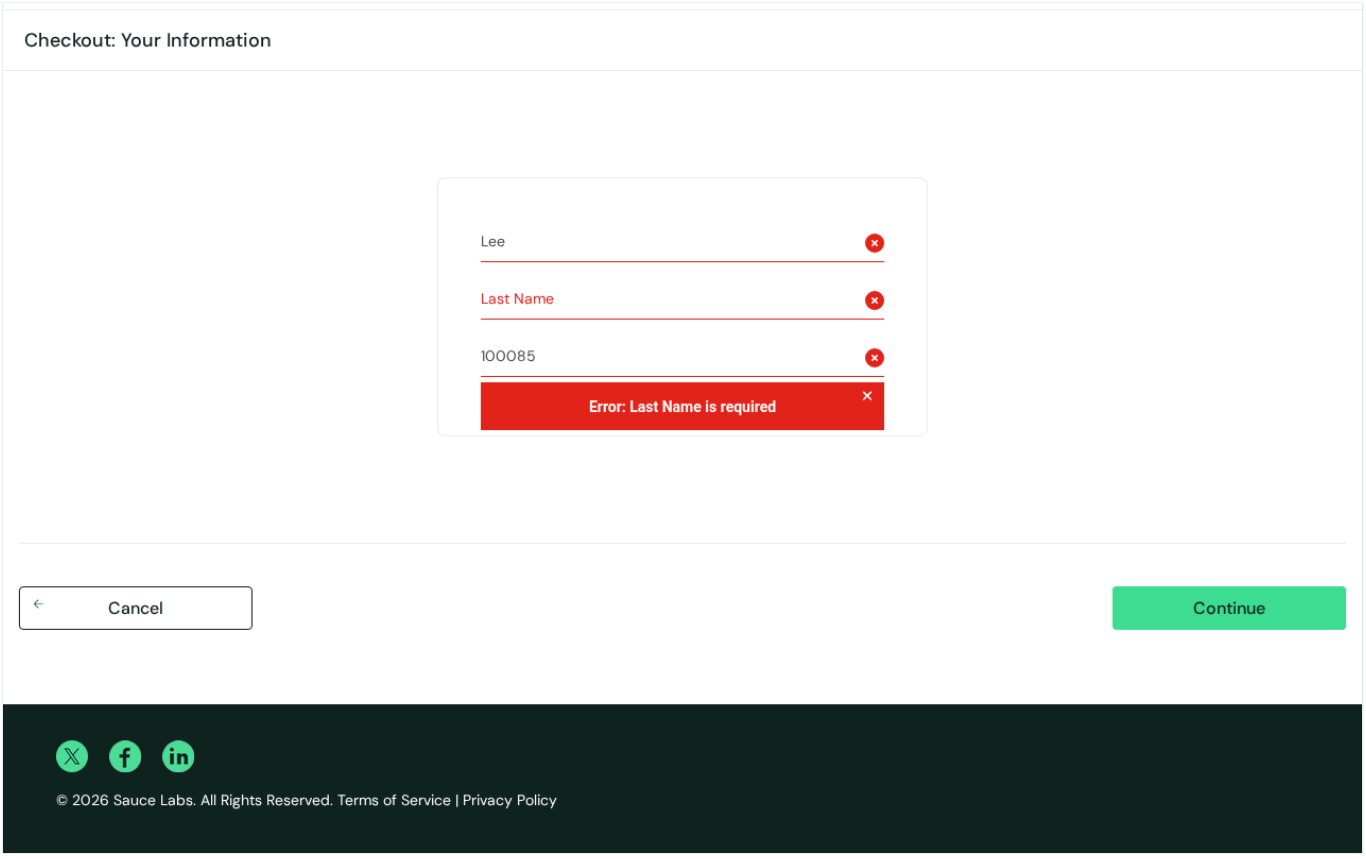

TC-10	Sorting	Name Z to A	Select Name (Z to A)	Descending names	Pass	Yes
TC-11	Sorting	Sorting (problem_user)	Select Price low-high as problem_user	List reorders	FAIL - BUG-02	No
TC-12	Sorting	Sorting (error_user)	Select Name Z-A as error_user	List reorders without error	FAIL - BUG-04	No
TC-13	Cart	Add/remove updates badge	Add 2 items; remove 1	Badge 2 then 1	Pass	Yes
TC-14	Cart	Add all items (problem_user)	Click every Add to cart	Badge shows 6	FAIL - BUG-05	No
TC-15	Checkout	Happy path	Add backpack + bike light; checkout; finish	Item total $39.98; confirmation	Pass	Yes
TC-16	Checkout	Required first name	Continue with empty form	Error "First Name is required"	Pass	Yes
TC-17	Checkout	Last name input (problem_user)	Type first and last name	Each field keeps its value	FAIL - BUG-03	Yes
TC-18	Checkout	Empty cart checkout	Checkout with empty cart	Checkout blocked or warned	FAIL - BUG-06	Yes
TC-19	Checkout	Whitespace / non-numeric input	Enter " " names and "abc" postal code	Validation rejects	Observation - accepted (OBS-01)	No
TC-20	Visual	Prices (visual_user)	Compare prices with standard_user	Same prices	FAIL - BUG-07	No
TC-21	Performance	Login time (performance_glitch_user)	Measure login	Comparable to standard_user	Not measured reliably (OBS-02)	No
